

Load Switches - NPS4053/Q100

Improve power consumption & system protection

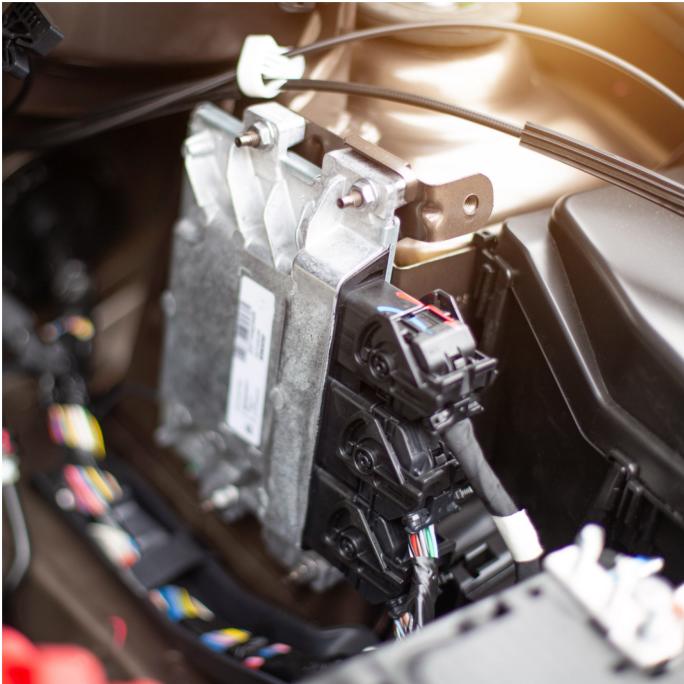

Designed in plastic thermal enhanced ultra thin small outline packages, no leads.

Load Switches - NPS4053/Q100

Design Benefits & Key Features

- Wide Input voltage: **2.5 V to 5.5 V**
- **110 mA to 2.5 A** adjustable current limit to meet multiple applications
- 6% current limit accuracy at **1.2 A**
- Constant-on or latch-off after over current
- Qualified to **AEC standard Q100** and suitable for automotive applications

Applications
